#### DETAILED ACTION

Applicant's election with traverse of Group IV, claims 23-27 and election of species of 9-(tetrahydro-2''-furyl)adenine for group B has been noted. However, upon further review, a supplemental election/restrictions is required.

#### *Election of Species*

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

The type of effective amount of inhibitor/activator administered to the patient from among those instantly claimed-i.e., inhibitor of adenylyl cyclase, inhibitor of protein kinase A, inhibitor of protein kinase C, or activator of Gi protein; see e.g., claim 23.

The single species/compound from each type of inhibitor/activator from among those instantly claimed-see claims 25, 26, 27.

Applicant is required, in reply to this action, to elect an inhibitor/activator and a single species/compound for each elected inhibitor/activator (i.e., elect an inhibitor of adenylyl cyclase and 9-(tetrahydro-2'-furyl)adenine) to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or

Art Unit: 1657

that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: 23.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: there is no special technical feature among all four groups. The special technical feature of the Group II-IV invention is an inhibitor of adenylyl cyclase, an inhibitor of protein kinase A, an inhibitor of protein kinase C or an activator of Gi protein which is not present in Group I. Thus, the species listed above do not relate to a single general inventive concept under PCT Rule 13.1.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in

Art Unit: 1657

compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
